About Company

AtliQ's is among the fastest-growing companies in the electronics market, offering premium-quality PCs, keyboards, mice, and printers tailored to the needs of both consumers and businesses.

Problem Statement

- AtliQ is expanding rapidly in the electronics market but lacks strong data-driven decision-making, causing losses in Latin America.
- Business decisions were based on surveys and assumptions instead of reliable data insights.
- Excel-based analysis is no longer sufficient as the company scales.
- Competitor Dell leverages a strong analytics team to understand customer behavior, demographics, and income patterns.
- To stay competitive, AtliQ has onboarded a data analytics team for transparency and strategic decision-making.
- This project aims to utilize data analytics to uncover business insights and accelerate AtliQ's growth.
- Turning raw data into actionable insights. Competing with Industry Leaders – Strengthening analytics to match Dell's market intelligence.

Project Approach & Process

Quick Overview of Process

Data Sources: Connected MySQL databases (gdb041, gdb056) and three Excel files (Target, Market Share, Operational Cost) in Power BI.

Data Integration: Imported all datasets into Power BI and performed data cleaning and transformation using Power Query Editor.

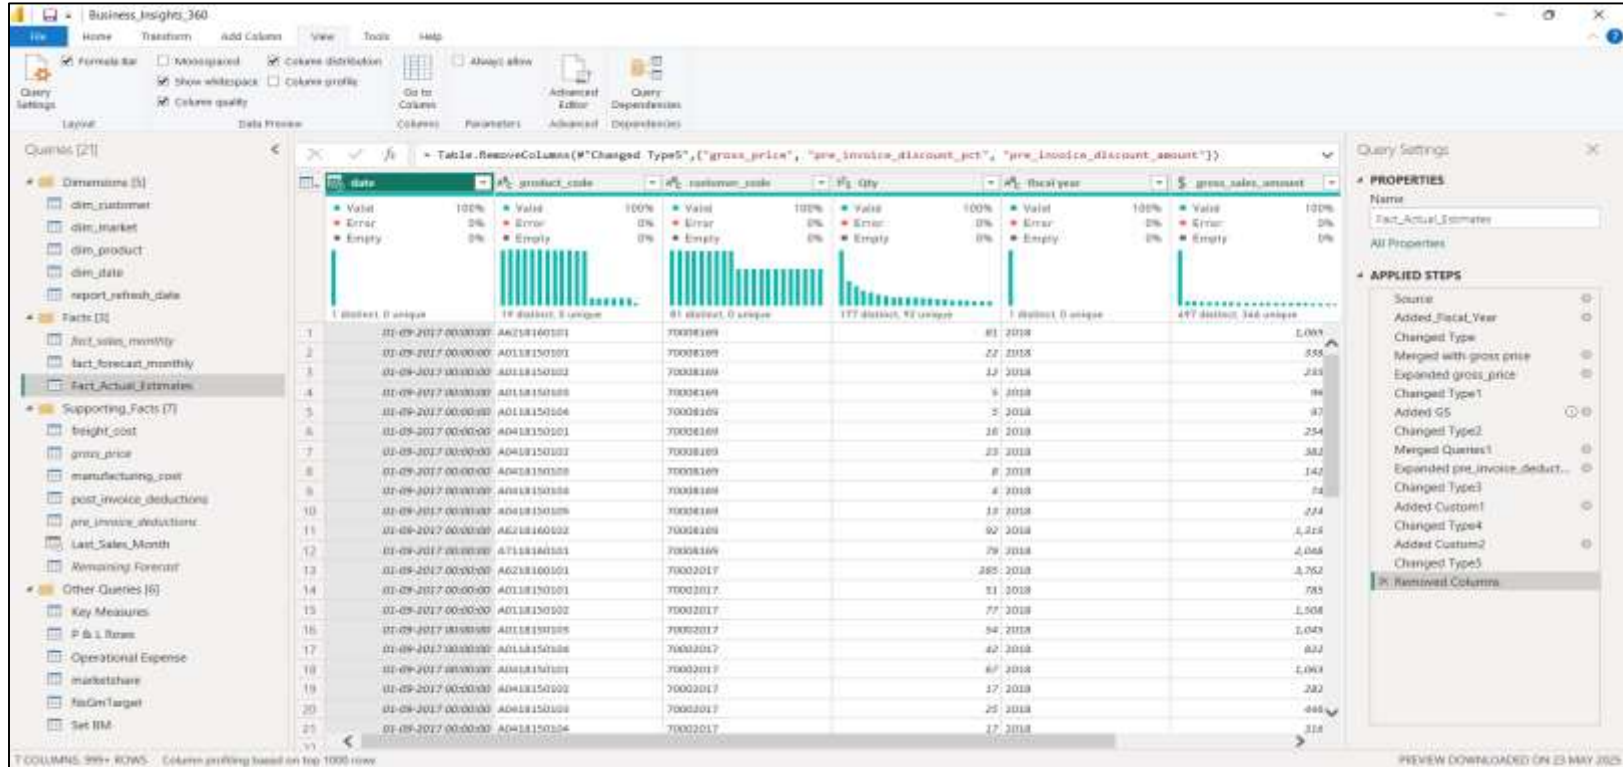

Data Modeling: Established relationships between tables using the Model View to create a structured data model.

Analytics Engine: Used DAX to create calculated columns, measures, and KPIs for deriving insights.

Visualization & Insights: Developed interactive dashboards in Power BI to support data-driven business decisions.

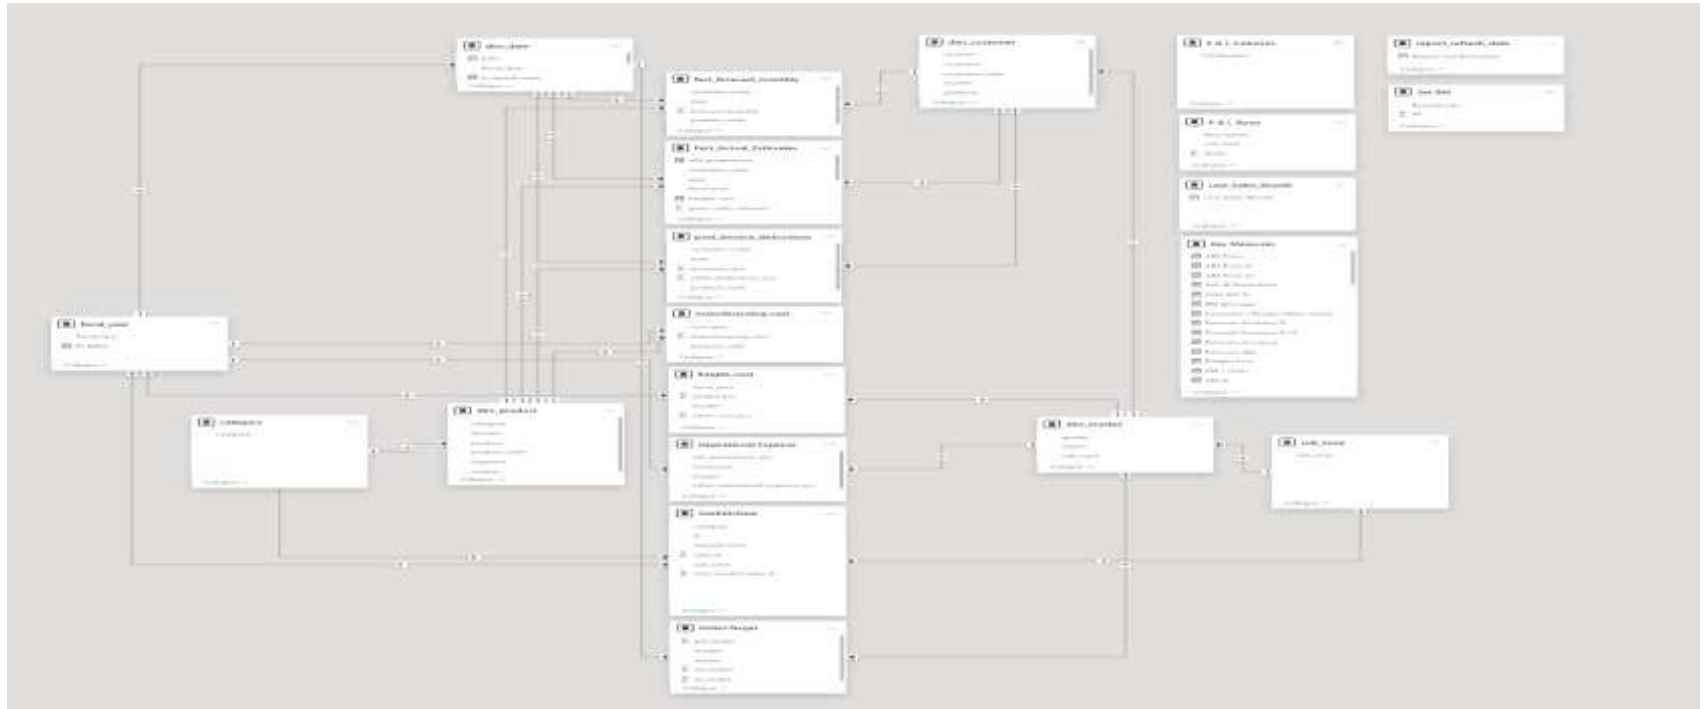

Data Cleaning And Transformation In Power Query

Data cleaning and transformation in Power Query involve preparing raw data by correcting errors, removing unnecessary details, and organizing it into a clear structure. This ensures the data is accurate, consistent, and ready for building reliable reports and dashboards in Power BI.

Data Modelling In Power BI

Data modeling in Power BI is the process of connecting different tables using relationships to create a structured and meaningful data model. It helps combine data from multiple sources so users can analyze and visualize it easily, ensuring accurate and efficient reporting.

Essential Dashboard Views for Stakeholders

Finance View: Profit & Loss statement to analyze financial performance across markets, products, and customers.

Sales View: Identifies top and bottom customers with key performance metrics to support strategic decision-making.

Marketing View: Evaluates product performance using detailed sales metrics and trend analysis.

Supply Chain View: Monitors reliability and forecast accuracy to enhance supply chain efficiency.

Executive View: Provides a high-level, integrated summary of key insights to support leadership and executive decisions.

Business Insights & Recommendations

1. Finance View (Profitability Challenges & Revenue Growth)

- Net profit is negative, despite increasing net sales compared to the previous year. Targets are not being met for 2022
- **Recommendation:** Identify key cost drivers, reduce operational expenses, and optimize pricing strategies to improve profit margins.

2. Sales View (Top Customers & Revenue Distribution)

- Amazon, Atliq Exclusive, Atliq eStore, and Flipkart are top customers generating the most revenue. Bottom customers like Nova, Otto, and All-Out have low revenue contribution.
- **Recommendation:** Strengthen long-term partnerships with top customers while reassessing pricing & marketing strategies for low-performing accounts

3. Marketing View (Product Performance & Regional Insights)

- High operational expenses & low net profit indicate inefficiencies in spending.
- Notebook segment has the highest net sales but the lowest net profit, especially in the Gaming category.
- The APAC region has the highest net sales & gross margin but also the lowest net profit
- **Recommendation:** Optimize marketing spend on high-margin products and reassess the profitability of the Gaming category. Improve regional cost control strategies in APAC.

4. Supply Chain View (Inventory & Forecasting Challenges)

- Forecast accuracy is 81.17% for 2022, but certain segments have high net errors, leading to excess inventory or stockouts.
 - LATAM & India regions show high stock issues, impacting supply chain efficiency.
- Recommendation:** Enhance demand forecasting models and supply chain planning to reduce inventory issues and optimize stock levels.

5. Executive View (Strategic Trends & Competitive Insights)

- Net sales are increasing year over year, but net profit is declining.
- AtliQ's market share is increasing over time.
- Amazon is the top revenue-generating customer while in product AQ HOME Allin 1 gen 2, but bottom products like AQ Digit SSD, AQ Pen Drive 2-in-1, and AQ Master Wired Mouse have poor sales.
- NA & India have the highest revenue contributions.
- PCs are generating the most revenue by division, and Retailers are the highest revenue-generating channel.
- **Recommendation:** Strengthen AtliQ's profitability strategy, focusing on high-growth region like NA & India. Phase out low-performing products and invest in high-demand categories like PCs to sustain market leadership.

Conclusion

- AtliQ's is growing, but profitability challenges exist.
- Data analytics has transformed decision-making, bringing transparency and accuracy. Strategic insights from this project help optimize costs, sales, marketing, and supply chain.
- Key focus areas: Improving profitability, strengthening market position, and leveraging data for competitive advantage.
- Next Steps: Continuous analytics innovation to drive AtliQ's success.
